## Countywide Services

### Proprietary Fee:

- Proprietary fees are based on market value.

### Collection Fee:

- This is a supplemental fee assessed to accounts placed with a collection agency. The fee will be the current contracted collection agency percentage fee of the balance due at the time the account is transferred to the collection agency. The collection fee will be removed if the account is removed from placement with the collection agency.
  - The fee is the amount charged by the collection agency.

### Computer Replacement:

- The annual rental rate may be charged to the department at cost. Also, the following formula may be applied:

$$\text{Annual Rental Rate} = \frac{\text{Cost of Computer Equipment}}{\text{Life Expectancy in Years}}$$

### Conduit Debt:

- Conduit Debt Review Fee – The review fee is five (5) basis points on the total par amount of the bond(s).
  - The minimum fee is \$10,000 and the maximum fee is \$25,000.
- Bank Eligible Obligation Issuance Fee – At the beginning of each calendar year, the County’s Finance Officer or designee shall calculate, based on then-current market rates and assuming a \$10 million issue of bonds maturing in 10 years. The fee is based on:
  - The difference between interest rates on bank eligible obligations and non-bank eligible obligations of the County (the “differential”), **AND**
  - The net present value (NPV) amount determined by applying said differential over a 10 year amortization period. The Bank Eligible Obligation Issuance Fee is equal to the NPV differential calculated above.

### Development Review Application Fees:

- The County Manager may waive development review application fees and charges to not-for-profit corporations that submit affordable housing projects (See the Alachua County Land Development Code for the definition of affordable housing).
- The manager, or designee, may set any combination of fees and charges for goods and services not specified in this fee resolution.
